PRINCIPAL FUNCTIONING AGENTS	
Proprietary blend of water conditioning agents, drift reduction agents, surfactants, formulation aids and constituents ineffective as a spray adjuvant	100%
TOTAL	100%

Components exempt from tolerance under 40CFR 180

GENERAL INFORMATION

Iconic® is a superior, multi-functioning adjuvant that contains a drift reduction agent*, water conditioner, and activator. It is designed with Advanced Droplet Technology™ that will enhance herbicide activity by getting more droplets to the target, increasing herbicide absorption and translocation, and making the herbicide more active. Iconic can be used with dicamba-based herbicides where crop protection products are used. NOT FOR AQUATIC USE.

*Spray drift reduction is dependent on many factors including equipment setup and weather conditions. For proper management of spray drift and spray deposition, all factors, including the condition and settings of the equipment and wind speed and direction, humidity and temperature must all be taken into account.

DIRECTIONS FOR USE

Prior to use read all directions on this label and on the label of the product used. The product label for specific usages and restrictions have precedence over directions for uses referred to on this label.
